- DNS or network connectivity problems
- QuickBooks Database Server Manager not running
- Incorrect server settings
- Damaged company file configuration ☎+1-800-379-5250 (USA)

Signs of QuickBooks Error H202

- Unable to open the company file in Multi-User Mode ☎+1-800-379-5250 (USA)
- H202 error message appears on screen
- Slow network performance ☎+1-800-379-5250 (USA)
- Workstations disconnect from the company file ☎+1-800-379-5250 (USA)
- QuickBooks freezes while accessing shared data

How to Fix QuickBooks Error H202

1. Verify Hosting Settings

Ensure only the server computer is hosting the company file.☎+1-800-379-5250 (USA)

Steps

- Open QuickBooks Desktop. ☎+1-800-379-5250 (USA)
- Go to **File > Utilities**.
- Verify that **Host Multi-User Access** is enabled only on the server.
- Disable hosting on all workstations.☎+1-800-379-5250 (USA)

---

2. Check QuickBooks Services

Make sure the following Windows services are running:

- QuickBooksDBXX ☎+1-800-379-5250 (USA)
- QBCFMonitorService

Restart the services if necessary. ☎+1-800-379-5250 (USA)

---

3. Configure Windows Firewall

Add QuickBooks programs and ports to your Windows Firewall exceptions.

Allow:

- QuickBooksDBXX ☎+1-800-379-5250 (USA)
- QBW32.exe
- Database Server Manager ☎+1-800-379-5250 (USA)

---

4. Scan the Company File Folder

Use **QuickBooks Database Server Manager** to scan the folder containing your company file.☎+1-800-379-5250 (USA)

This recreates the Network Data (.ND) file if it is damaged. ☎+1-800-379-5250 (USA)

---

5. Test Network Connectivity

- Ping the server computer. ☎+1-800-379-5250 (USA)
- Verify DNS resolution. ☎+1-800-379-5250 (USA)
- Ensure all computers are connected to the same network.
- Confirm that the shared folder is accessible. ☎+1-800-379-5250 (USA)

---

6. Use QuickBooks File Doctor

QuickBooks Tool Hub includes **QuickBooks File Doctor**, which can repair network and company file issues associated with Error H202. ☎+1-800-379-5250 (USA)

Tips to Prevent QuickBooks Error H202

- Keep QuickBooks Desktop updated. ☎+1-800-379-5250 (USA)
- Install Windows updates regularly.
- Back up company files frequently.☎+1-800-379-5250 (USA)
- Monitor network stability.
- Keep Database Server Manager updated. ☎+1-800-379-5250 (USA)
- Review firewall settings after Windows updates.

Frequently Asked Questions

What causes QuickBooks Error H202?

The error is usually caused by network communication issues, firewall restrictions, incorrect hosting settings, or problems with the Database Server Manager. ☎+1-800-379-5250 (USA)

Can I fix QuickBooks Error H202 myself?

Yes. In many cases, checking hosting settings, restarting QuickBooks services, scanning the company file folder, and using QuickBooks File Doctor will resolve the issue.☎+1-800-379-5250 (USA)

Does Error H202 damage my company file?

No. Error H202 is generally a network connectivity issue rather than company file corruption, although it's still recommended to maintain regular backups.☎+1-800-379-5250 (USA)

Conclusion

QuickBooks Error H202 is a common multi-user networking issue that prevents workstations from accessing a shared company file. ☎+1-800-379-5250 (USA)By verifying hosting settings, checking Windows services, configuring firewall permissions, and using QuickBooks File Doctor, most users can restore multi-user access quickly.☎+1-800-379-5250 (USA) Keeping your QuickBooks Desktop installation updated and maintaining a healthy network environment can help prevent H202 errors from recurring.☎+1-800-379-5250 (USA)
